

In 2025 GCNH was asked by St Martin de Porres Academy, a grade 5-8, tuition-free middle school for low-income students entirely funded by private donations and non-public money to help with a landscape design to beautify its site on Columbus Avenue in New Haven. The project entailed assess existing plantings, conduct soil testing and remove mugwort from the site. A time line and design were developed. The Club anticipates this to be a 2-year project.
